DETAILED ACTION

This application has been examined. The claims 1-22 are pending. The examination results are as following.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Independent claims 1-4, recites the limitation “said plurality of discharge cells to generate a sustain discharge in a respective one of the following operating modes selected based upon use of said plasma display device...” Examiner is not clear whether all modes are included in the same display device, and that the mode is selected based on the nature use of the same display, or each display include one of the mode based on the use of the specific display. A clarification and/or correction are respectfully requested by examiner.

Independent claims 1-3, also recites the inequalities “a time duration of said third portion > a time duration of said first portion which includes 0 seconds” and “a time duration of said fourth portion > a time duration of said second portion which includes 0 seconds”. It is not clear how a time duration includes 0 seconds and still considered as time duration when there is no time period (i.e., seconds) in it. Examiner respectfully requests a clarification and/or correction.
